

Gelating Timer NJ11

Product name:	Gelating Timer
Brand Name:	ASIDA
Model Number:	NJ11
Place of Origin:	China
Packaging Details:	Wooden Carton

USAGE

Special appliance that used for testing gel time of prepreg and resin in CCL and PCB industry.

Features

1. Adopts temperature control of SGUNADEBR, digital display, PIN control, precise temperature control of gum pond, with control accuracy of $\pm 5^{\circ}\text{C}$.
2. Time-accurate, the minimum resolution is 0.1S.
3. Reliable over current, earth leakage protection devices, enhancing operational security.
4. The operation is simple and convenience, designed with two start/stop control buttons in left and right side, which is adaptable for different experimental groups who have different habits to use either hand.
5. Large LCD digital display, the appearance is new and elegant.

SPECIFICATIONS

ITEM	SPECIFICATION
model	NJ11
time range	0 ~ 999.9s
Temperature adjustable range	0 ~ 200 $^{\circ}\text{C}$
Temperature control accuracy	$\pm 0.5^{\circ}\text{C}$
power requirement	AC220V 50Hz
power	150W
glue-pond dimension	$\Phi 20\text{mm}$
appearance dimension	350 \times 350 \times 480mm
weight	15kg
