

## Long-arm Board Thickness measurement (CB21)

### USAGE

For precision measurement of copper clad laminate, the thickness of PCB and other boards. Three decimal of digital display, equip with foot switch to facilitate the measurement and get reading.

### Characteristic

- Deep roar, can meet the measure requirements of large plate.
- Large thickness measurement range with high accuracy up to 0.003 mm.
- Arbitrary switching of mm/inch units .
- Measurement datas are displayed on LCD screen.
- Zero setting at any position.
- Granite countertops, durable and beautiful.
- Stable and reliable performance, simple operation, easy to use.

**Technical Parameters**

ITEM	SPECIFICAION
MODEL	CB21
Appearance Dimension	800mmX882mmX1280mm(L X W X H)
Depth	530mm
Measurement Range of Board Thickness	0~255mm
Table Height	920mm
Table Siae	800mmX700mm
Accuracy	0.003mm
Rating COLTAGE/Current/Power	AC220V 50Hz/0.3A/100W
Weight	110Kg
